

PHYSICAL ACTIVITY RESEARCH: PORTFOLIO ANALYSIS

Physical Activity Workshop: How do we get more people moving more?
December 14, 2012

What is Portfolio Analysis?

2

- Purpose: To describe the distribution of projects and research that NIH funds
- Identify trends in funding
- Aids strategic planning initiatives, budget analysis

QVR

Purpose for PA Portfolio Analysis

3

- To provide a preliminary, high-level overview of NIH's physical activity funding portfolio
- To identify distribution of funding portfolio
 - ▣ Over time
 - ▣ Across ICs
 - ▣ Across different categories

PA Portfolio Analysis: Overview

4

- 1. Search with QVR (Query/View/Report)
- 2. Develop validation rubric
- 3. Manually sort and validate grants
- 4. Identify challenges and limitations to understand boundaries of the analysis
- 5. Analyze data

PA Portfolio Analysis: Step 1

5

- Search with QVR (Query, View, and Report)
 - ▣ Limited search to RCDC category “Prevention”
 - ▣ Searched FY2008-FY2011
 - ▣ Funded and Awarded NIH grants
 - ▣ Broad keyword search terms in title and abstracts of grant applications: “Exercise” or “Physical Activity”

Portfolio Analysis Process: Step 2

6

- Validation Rubric: Used titles and abstracts
 - ▣ Did not include: Animal studies, tertiary prevention, meditation
 - ▣ Did include:
 - If “physical activity” or “exercise” was mentioned in the title or abstract
 - if PA was measured or included in questionnaire
 - physical inactivity/sedentary behavior
 - Large trials or studies that incorporated PA (Look AHEAD, Mr. OS)
 - ▣ Did not group grants into further categories

Portfolio Analysis Process: Results

7

- After manual validation...

Fiscal Year	Number of entries	Valid entries	% Valid entries
2011	1285	787	61%
2010	1537	876	57%
2009	1617	932	58%
2008	1314	817	62%
2008-2011	5753	3412	59%

Challenges and Limitations

8

- RCDC coding: Computerized reporting process
- Tracking multi-year projects
- Does not accurately reflect budget
- Does not capture detailed information

Challenges and Limitations, pt. 2

9

- Implications for data analysis results:
 - ▣ Very rough overview of physical activity portfolio
 - ▣ Unknown sensitivity, high specificity
 - ▣ Qualitative rather than quantitative

Budget

10

NIH Prevention and Physical Activity Research Budget

PA Budget vs. RCDC Categories

11

Average Funding Per Year (FY2008-11)

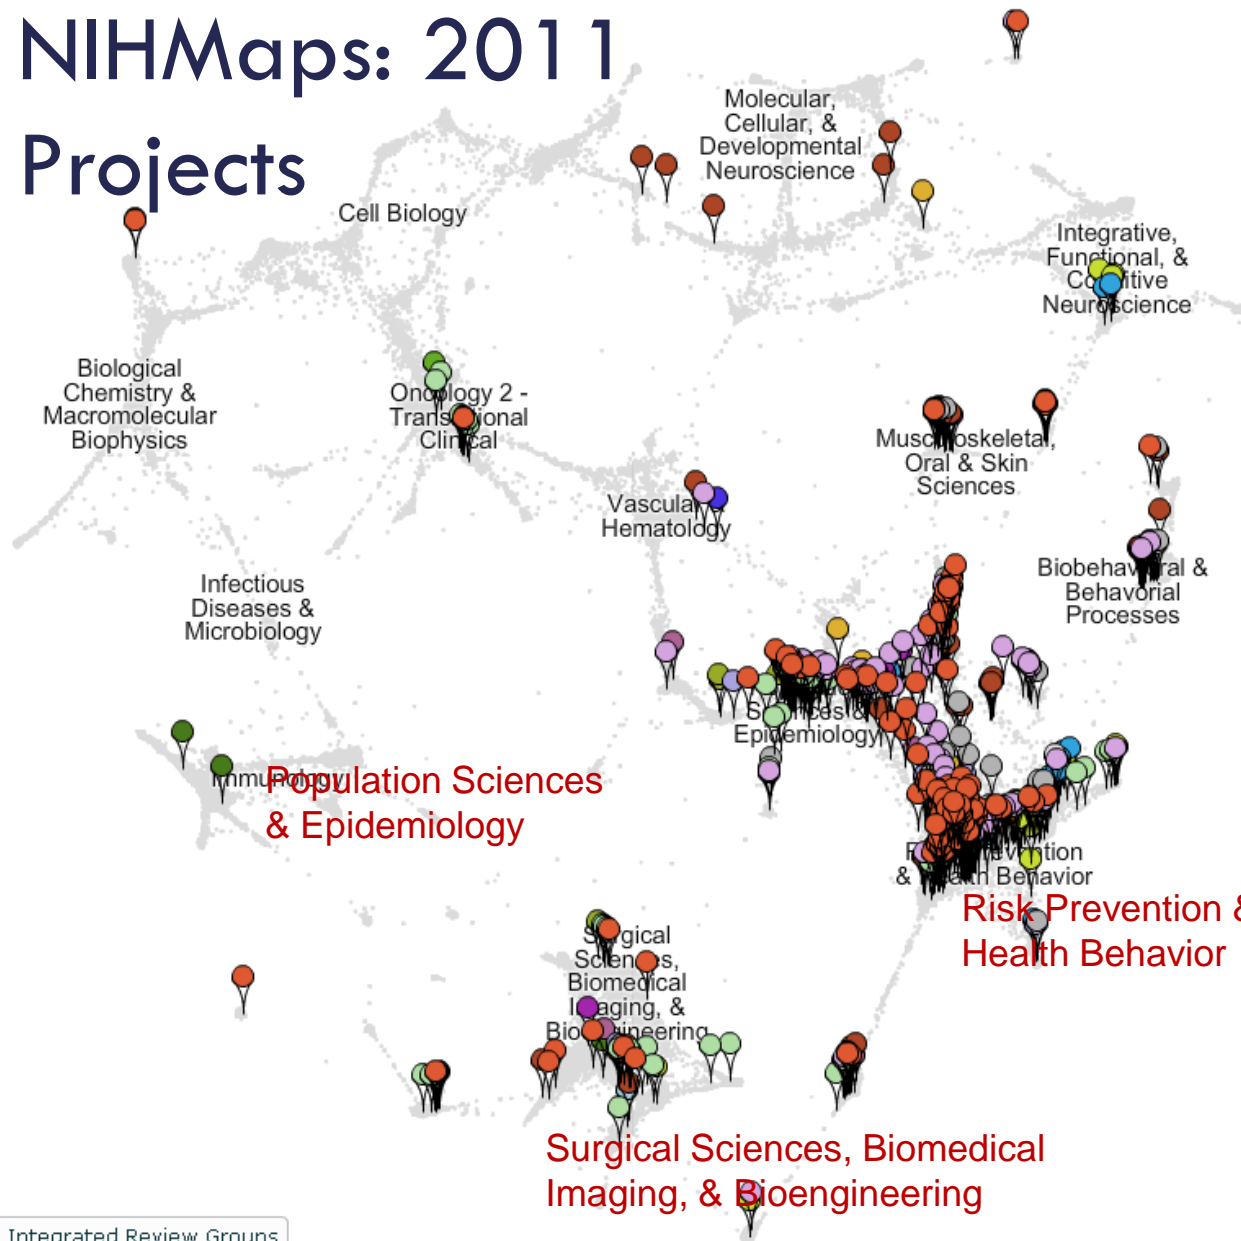

Data Visualization Programs

12

- NIH Topic Maps: Cluster-based visualization using CSR Integrated Review Groups
- IN-SPIRE: Text-mining and data visualization tool
- NIH Portfolio Visualization Tool (Pviz)

Projects by Year

16

Projects by Year

17

Grant Activity Codes

18

- F- Fellowship Programs
- K- Research Career Programs
- P- Research Program Projects and Centers
- R- Research Projects
- U- Cooperative Agreements

Projects by Activity

19

Distribution by Funding Mechanism

20

□ R- Research Projects

R01: Research Project

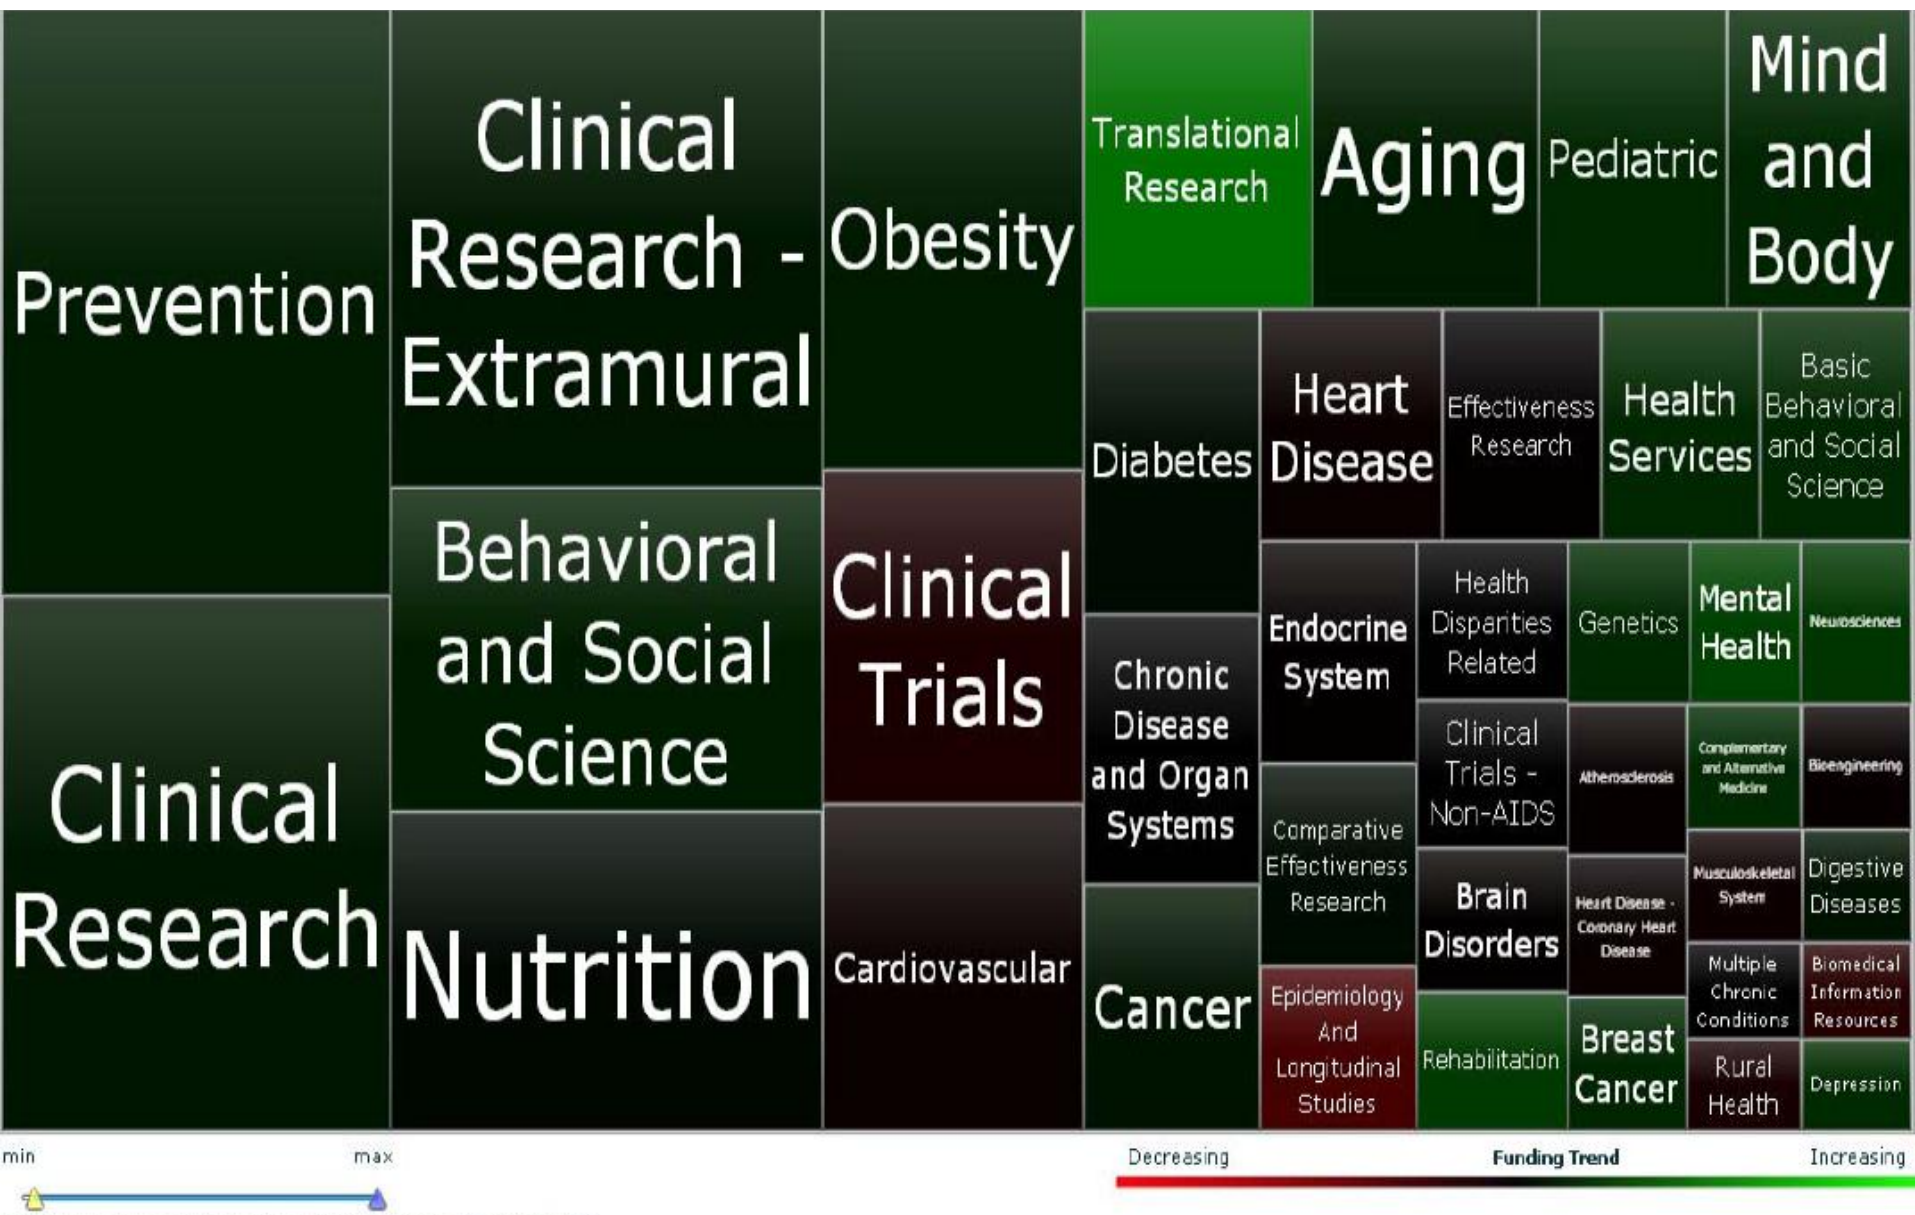

R03: Small Research Grants

R18: Research Demonstration and Dissemination Projects

R21: Exploratory/Developmental Grants

R24: Resource-Related Research Projects

PViz: Most Common RCDC categories

IN-SPIRE

22

Projects by Theme

23

- From PA guidelines:
 - ▣ Population groups: women, children/youth
 - ▣ Obesity/weight
 - ▣ Diabetes
 - ▣ Cardiovascular disease
 - ▣ Environments: neighborhood, school, community
 - ▣ Accelerometry and pedometry
 - ▣ Exercise types: aerobic activity, resistance training, bone-strengthening

Projects by theme: FY08-FY11

24

Projects by Theme: “Accelerometry” or “Pedometry”

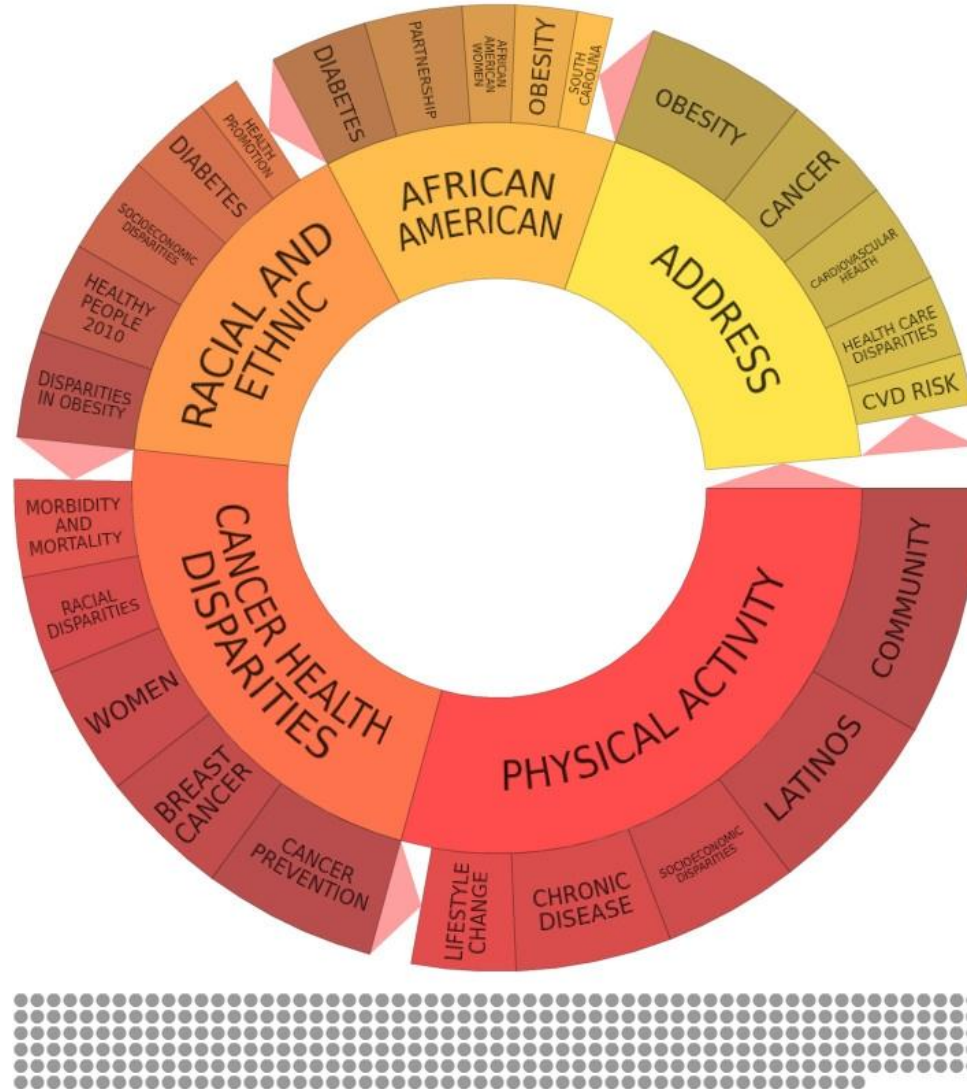

25

IN-SPIRE

Common Themes: “Disparities”

26

Trends in Exercise Categories

Summary Discussion

29

- **Were you surprised by any of the data – e.g. number of projects, themes of IC distribution?**
- **If you were to make a recommendation on mechanism of award (R, K, P) and the state-of-the-science in PA research, what should NIH focus on for the next five years?**
- **From information and themes depicted in the visualization, are there themes or areas of research that should receive increased emphasis, decreased emphasis?**

Additional discussion questions

31

- Are there new approaches for strengthening the evidence base for future physical activity program and policy initiatives?
- What are the key questions related to future study designs, physical activity measurement methodology, etc.?
- What are the priority research and program needs?

Supplemental Information

32

- The following slides contain additional materials produced from the portfolio analysis process

Projects by IC: FY2011

33

Distribution of Projects by Activity

34

Distribution of projects by activity (FY08-FY11)

Distribution of projects by activity (FY11)

Distribution by Funding Mechanism

35

□ P- Research Program Projects and Centers

P01: Research Program Projects

P20: Exploratory Grants

P30: Center Core Grants

P41: Biotechnology Resource Grants

P50: Specialized Center

P60: Comprehensive Center

Distribution by Funding Mechanism

36

□ K- Research Career Programs

K01: Research Scientist Development Award

K07: Academic/Teacher Award

K23: Mentored Patient-Oriented Research Career Development Award

K24: Midcareer Investigator Award in Patient-Oriented Research

Distribution by Funding Mechanism

37

□ U- Cooperative Agreements

U01: Research Project

U10: Cooperative Clinical
Research

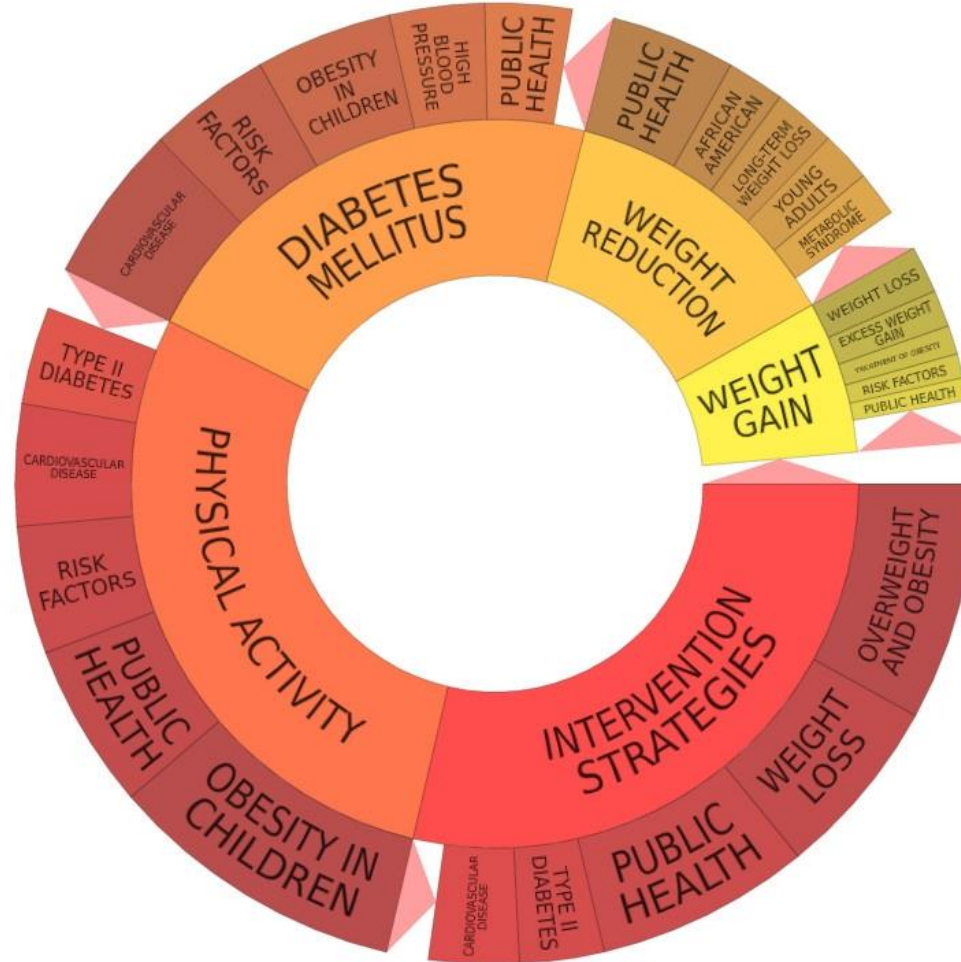

U13: Conference

U19: Research Program

U54: Specialized Center

Common Themes: “Obesity”
